Investment risks: Please be reminded that all investments carry, depending on their nature, a degree of risk. Some investments may be subject to sudden and large falls in value and on realization you may receive back less than you invested. Some investments may not be readily disposable since the market in such securities is illiquid and therefore identifying and quantifying the risk to which you are exposed may be difficult. You should consult your UBS client advisor on the nature of any specific investment you are interested in **and carefully consider whether such investment is appropriate for you before making any decision on an investment or transaction.**

Important Information Cont.

For further information on the risks of specific types of investments and transactions we refer to the brochure "Special Risks in Securities Trading" and the document "Additional Risk Information" previously sent to you. Please ask your UBS client advisor for further copies of these documents if you deem necessary. The information contained in this presentation on specific investment opportunities or on investment strategies and asset classes in general is in abbreviated form. It is not intended to provide the sole basis of an evaluation of an investment and should not be considered a recommendation by UBS that an investment is suitable for you. UBS shall have no responsibility for the performance of investment instruments or an asset class selected by you and shall assume no liability for the selection and decision you may take.

Risks of investing in funds: Investments in Funds bear specific risk that can be substantial. The market exposure inherent in units of a Fund is closely related to the underlying instruments the Fund is invested in. Investments in funds may be subject to sudden and large falls in value and on realization or (in case of default of the fund) on the winding-up of the Fund the investor may receive back less than invested, lose the total amount invested or may be required to pay more. Some investments may not be readily realizable since the market in the securities is illiquid or because of minimum holding periods and therefore valuing the investment and identifying the risk to which the investor is exposed may be difficult to quantify. It may thus be difficult for an investor either to sell, transfer or realize the investment or to obtain reliable information about its value or the extent of the risks to which it is exposed. Should substantial redemptions be made at the same point of time, this could negatively impact the investor's redemption rights (illiquidity/exit risk).

The above is not an exhaustive list of risks of investing in a fund. You should take any investment decision only upon the basis of a fund's current and complete legal documentation. We further advise you to obtain independent legal advice when considering an investment.
